

Dr. Hijran Zainalabidin Toama

Dr. Hijran Zainalabidin Toama received his B.Sc. degree in petroleum and minerals engineering from the College of Engineering, University of Baghdad, Baghdad, Iraq, in 1978. He obtained his M.Sc. degree in extractive metallurgy engineering in 1999 and his Ph.D. degree in metallurgical engineering in 2007 from the Department of Production Engineering and Metallurgy, University of Technology, Baghdad, Iraq. From 1978 to 2008, he worked for the State Company of Phosphate/ Ministry of Industries and Minerals, graduating from the position of an engineer to an expert degree and holding various positions. In 2008, he joined the University of Technology/Department of Production Engineering and Metallurgy as a lecturer and later became the head of the Mining and Extractive Metallurgy Engineering Branch from 2013 to 2017. He taught multiple courses in mineral and metallurgical engineering and supervised several M.Sc. students at the University of Technology. His research experience includes mineral processing, extractive metallurgy, metallurgical engineering, and the phosphate industry.
