

Dr. Mustafa Alheety

Dr. Mustafa Alheety is an Iraqi inorganic-nanotechnology chemist and academic, currently serving as Assistant Chief Chemist at the Iraqi Geological Survey. He received his B.Sc. in 2012 from the University of Anbar-Iraq, and then obtained his M.Sc. in 2015 and Ph.D. in 2018 from Tikrit University-Iraq. He began his academic career as a faculty member at the Middle East University College and then moved to Al-Hadi University College in Baghdad in 2018-2020. He has extensive experience in supervising several M.Sc. students in Iraq. He is currently supervising several Ph.D. students at USM University-Malaysia and Tunis El Manar University-Tunisia. Dr. Alheety is a guest editor of several scientific journals, including the Macromolecular Symposia -Wiley-VCH and Results in Chemistry. He is also a member of several scientific committees at international conferences, mainly supported by the journal Materials Today Proceedings. His research interests are diverse and according to recent papers, he works in the field of hydrogen energy as well as composites of natural materials, such as clays and rocks, improving the specifications of raw materials, and extracting compounds from natural materials. He has published 92 papers from 2019 to 2024 and reviewed more than 400 papers in well-known journals, such as ACS, Elsevier, Springer, scientific.net, and Wiley-VCH. He has several unpublished scientific reports for the Iraq Geological Survey that contribute to a deeper understanding of his research areas. For more information, kindly visit the following links:
